Who's got SPIRIT?!?! ARIZONA HOSA does!!!

Arizona has been known and continues to be known for its stellar reputation in the leaders that it produces within the state. It has been a privilege for this state to have two outstanding past state officers to be slated in becoming National HOSA officers, where if elected, will represent every chapter and member within the United States and internationally as well. So, we congratulate Elizabeth Carnesi and Jamie Stewart on their accomplishment of being slated for National Officer positions!

Everyone did an outstanding job showing their love and spirit for the state of Arizona! Just as the National HOSA officers and the guest speakers have repeatedly said, you should all be very proud for representing Arizona in competitive events, recognition, and receiving scholarships at the National level! So congratulations to you all! It is an amazing feeling to be surrounded by unique individuals from the across the nation and around the world, who are headed in the right direction to becoming the leaders of tomorrow, just as Dr. Sampson said.

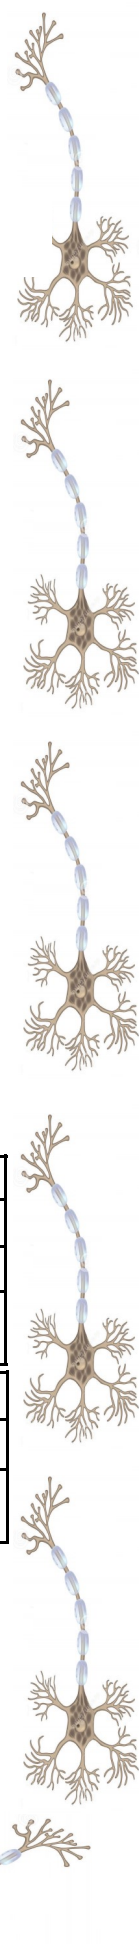

As discussed at the state meeting, our new theme is, **Share Your Cellfie!** You can determine what cell you are, by taking the twelve minute test at [16 Personalities.com](http://16Personalities.com). There you can learn about your own methods of leadership. Each of the main groups has basic personality traits. Individuals who are pioneers are visionaries, while connectors love to bring people together. Guardians like to follow the rules to a point, and creatives like to bring in new ideas. Last but not least, nurturers take pride in caring for their family and friends. Each of these personality types can be shown on the table below. Make sure to take cellfies with everyone you meet and post them on social media with the #AzHOSACellfie! AzHOSA might share your cellfie in the near future!

Disney Fun Fact!:

Did you know real skeletons were used as props when the Pirates Of the Caribbean ride first opened. Today there is only one skull left on the ride. It is the one attached to the headboard.
